

## Web Exercise

### CTET 225

As a resource for your Internet project we will use the website *How to Use the Internet in Your Classroom* at <http://www.canter.net/netskills>. The site also has additional articles, resources and activities related to the Internet in the classroom as well as a useful glossary with descriptions of terms.

In this exercise you will explore more thoroughly the structure you have chosen for your Internet Project. If you are working with a partner on the Internet Project, each of you needs to complete this exercise individually.

- Individually complete the one web activity related to your structure. To find the appropriate activity, go to the web site, click on the “*Activities*” button, and then on the activity that matches your structure.
- Word process your answers, save the file with the name indicated (use your own name, of course!), and drop in the digital drop box by the due date.

If you have chosen to do a Research Module, go to Activity 5.

- Complete steps 1-5. Word process your evaluations for step 5.
- Add to the document your responses to the prompts found under *Conclusions*.
- Save your document as *yourlastname\_web.doc*.
- Drop your responses in the digital drop box.

If you have chosen to do a Web Quest, go to Activity 6.

- Complete steps 1-4. Word process your evaluations for step 4.
- Add to the document your responses to the prompts found under *Conclusions*.
- Save your document as *yourlastname\_web.doc*.
- Drop your responses in the digital drop box.

If you have chosen to do Internet Collaboration, go to Activity 7

- Complete steps 1-4. Word process your evaluations for step 4.
- Add to the document your responses to the prompts found under *Conclusions*.
- Save your document as *yourlastname\_web.doc*.
- Drop your responses in the digital drop box.
